

## 1. Data Model Availability

- There is no data model. 1 pts.
- There is a known and accepted data model, but some key fields are uncoded or free text. 2 pts.
- Key fields are codified using a local standard and updated over time. 3 pts.
- Key fields are codified using a national or international standard and updated. 4 pts.
- The data model conforms to an international standard, and key fields are codified using a national or international standard. 5 pts.

## 2. Standardization of Key Fields

- Key fields are not standardized. 1 pts.
- Some key fields are standardized using a local standard. 2 pts.
- Key fields are standardized using a national or international standard. 3 pts.
- Key fields are standardized and updated using a national or international standard. 4 pts.
- Key fields are standardized and conform to an international standard. 5 pts.

## 3. Updates and Maintenance

- No updates or maintenance of the data model. 1 pts.
- Partial updates and maintenance of the data model. 2 pts.
- Regular updates and maintenance of the data model using a local standard. 3 pts.
- Regular updates and maintenance of the data model using a national or international standard. 4 pts.
- Regular updates and maintenance of the data model conforming to an international standard. 5 pts.

## 4. Interoperability and Standardization

- No interoperability or standardization. 1 pts.
- Partial interoperability or standardization. 2 pts.
- Full interoperability and standardization using a local standard. 3 pts.
- Full interoperability and standardization using a national or international standard. 4 pts.
- Full interoperability and standardization conforming to an international standard. 5 pts.
